SUMMARY

Software Engineer with 4+ years of experience developing scalable web applications using React, Vue.js, TypeScript, and modern JavaScript. Expertise in building reusable UI components, integrating REST and GraphQL APIs, and developing backend services with Node.js and Python. Experienced in implementing automated testing with Jest, Cypress, and React Testing Library, ensuring high code quality through best practices and code reviews. Strong experience delivering end-to-end features in Agile environments with a focus on performance, maintainability, and user experience.

TECHNICAL SKILLS:

- **Frontend:** React, Vue.js, Next.js, JavaScript (ES6+), TypeScript, Redux, Context Api, TanStack query, Material UI/Ant UI, HTML5, CSS3
- **Backend:** Node.js, Express.js, Python(Flask), Sequelize, SQLAlchemy
- **Testing:** Jest, Cypress, React testing library
- **Tools:** Git, SonarQube, REST APIs, GraphQL APIs, Jira, Bitbucket
- **Other:** DSA, API Integration, Code Reviews, Agile Development, Web Accessibility(WCAG)

PROFESSIONAL EXPERIENCE

Infojini Inc
Senior Software Engineer
Aug 2024 – Present

Hyderabad

Washington State Library [React, Typescript, Node.js, Jest, Auth 2.0]

- Developed the complete frontend application using React and TypeScript, implementing responsive UI components and modern design practices.
- Built and integrated RESTful APIs using Node.js, enabling secure data communication and seamless frontend–backend interaction with OAuth 2.0 authentication.
- Wrote unit and integration test cases using Jest, ensuring application reliability and improving overall code quality.

Virginia Commonwealth University [React, Typescript, Cypress, Shibboleth(SAML), Fitbit, WCAG guidelines]

- Developed the frontend application independently using React and TypeScript, building responsive and reusable UI components for the Virginia Commonwealth University platform.
- Implemented Shibboleth (SAML) authentication integration, enabling secure single sign-on (SSO) for university users.
- Integrated Fitbit APIs to fetch and display health and activity data, and implemented end-to-end testing using Cypress to ensure application stability and functionality.

Dining Infojini [React, Typescript, GraphQL APIs, Material UI(MUI)]

- Developed the Dining Infojini application from scratch using React, TypeScript, and Material UI (MUI), building a responsive and intuitive interface for employee meal management.
- Integrated GraphQL APIs to handle meal record data and enable efficient communication between frontend and backend services.
- Implemented a QR code–based meal scanning system allowing employees to quickly access lunch or dinner through the application.
- Ensured application stability and quality by implementing end-to-end testing using Cypress and following best coding practices.

HRMS [React, Material UI]

- Developed and maintained a comprehensive Human Resource Management System (HRMS) using React and material UI(MUI).
- Spearheaded collaboration with cross-functional teams to gather and analyze over 50 requirements, ensuring alignment with strategic business objectives; streamlined project delivery timelines by 20%.
- Collaborated with cross-functional teams to gather requirements, ensuring alignment with company goals. Proactively addressed issues, enhancing customer satisfaction and system reliability.

SSHC [Node.js, Express.js, Jest, PostgreSQL]

- Constructed and maintained a Senior Solutions Healthcare System. Improved readability and efficiency of the client's current codebase and incorporated new features through the creation of many REST APIs.
- Guaranteed strong database management and error handling for enhanced system dependability and user experience.
- Evolved comprehensive unit tests using Jest to ensure high performance and maintain exceptional code quality.

FCC [Python, Unittest, PyTest, PostgreSQL]

- Constructed and maintained a Senior Solutions Healthcare System. Improved readability and efficiency of the client's current codebase and incorporated new features through the creation of many REST APIs.
- Guaranteed strong database management and error handling for enhanced system dependability and user experience.
- Evolved comprehensive unit tests using Jest to ensure high performance and maintain exceptional code quality.

WebMobi Front end Developer Mar 2022 – Apr 2023

Bangalore

Event Management Software [React, MUI, Cypress]

- Developed and designed screens according to client requirements using React 18 and MUI, ensuring a user-friendly and responsive interface.
- Integrated video calling and messaging functionalities using Socket.io, enhancing real-time communication capabilities within the application.
- Implemented REST APIs with React for seamless frontend-backend data exchange, added CRUD functionality for uploading attendee details (videos, photos, documents), and incorporated 3D features to enhance user interaction and experience.

ACHIEVEMENTS

- **Client Appreciation:** I received numerous compliments from our clients for my timely resolution of application problems, my root cause analysis, and my assistance in improving the team's code.
- **Employee of the Month:** Our client project's exceptional proof of concept was acknowledged by office management.

EDUCATION & OTHER

- Techno India University Bachelor of Computer Application 2016 - 2019
CGPA - 7.6

LANGUAGES: English, Hindi, Bengali
